Yardwork

AI-agent DPIA country lookup

EU / EEA · Selected clauses; full conditions in the article and original publications.

Bulgaria: EDPB-hosted English publication; no Bulgarian original quoted. Thuringia: own original unavailable; no clause or translation supplied.

Country	Clause to check
Austria	Separate individual/combined tests
Belgium	Third-party data and service decisions
Bulgaria	Technology migration at scale
Croatia	Employee monitoring applications
Cyprus	Monitoring and scoring criteria
Czechia	Structured processing classification
Denmark	New technology plus another criterion
Estonia	Cross-border scale and monitoring
Finland	Specific categories with conditions
France	Constant employee-activity monitoring
Germany	Shared DSK; see Land lookup
Greece	AI and combined-source processing
Hungary	Systematic employee-work monitoring
Iceland	Employee behaviour; technology combinations
Ireland	Documented preliminary screening
Italy	Innovative technology plus another criterion
Latvia	Additional domestic employee cases
Liechtenstein	Systematic innovative technology with conditions
Lithuania	Call recording and employee monitoring
Luxembourg	Monitoring with significant effects
Malta	Work-performance evaluation or scoring
Netherlands	Large-scale and/or systematic monitoring
Norway	Systematic employee monitoring
Poland	Comparisons and inference across sources
Portugal	Profiling and qualified tracking
Romania	Large-scale vulnerable-person monitoring
Slovakia	Qualified monitoring and technology combinations
Slovenia	Separate domestic/cross-border lists
Spain	Two-criteria guidance; non-exhaustive
Sweden	Two criteria; individual risk review

Country labels link to the original publication. This index does not decide a deployment's legal classification.

German Land publications

Distinguish the competent authority, public/non-public scope and current/earlier versions. Read the full clause before using an example.

Bulgaria: EDPB-hosted English publication; no Bulgarian original quoted. Thuringia: own original unavailable; no clause or translation supplied.

Land	Publication and scope
Baden-Württemberg	Own non-public-sector list linked by the authority. The employee entry includes extensive information and significant effects; read its full clause.
Bavaria	The BayLfD public-sector Blacklist includes confidential personnel files and an AI category. The separate BayLDA business guidance links the shared DSK text.
Berlin	Own public-sector list, 25 May 2018. The quoted entry concerns evaluating personality; the recording phrase alone is not the entire operation.
Brandenburg	Own public-sector list. The personnel-file entry includes confidential or highly personal data; employment behaviour is a separate entry.
Bremen	Own public-sector list. Its AI clause concerns interaction with people or evaluation of personal aspects, with public-service examples.
Hamburg	Own public-sector list, version 2.0a. The authority's landing page separately links a non-public-sector DSK version.
Hesse	The linked publication reproduces shared DSK wording. The phrase is an application field alongside the qualified employee-behaviour clause.
Mecklenburg-Vorpommern	Own public-sector list, 4 July 2018. Read the rest of the AI clause: personal-data processing to control interaction or evaluate personal aspects.
Lower Saxony	Own public-sector list includes municipal and statewide registration processing. The current page separately publishes the shared non-public-sector list.
North Rhine-Westphalia	Own public-sector publication is linked from the authority's dedicated Article 35(4) page. Use the public-sector document for its stated scope; do not relabel it as a business list.
Rhineland-Palatinate	Own public-sector list, 24 May 2018. Its landing page separately links the DSK non-public-sector list.
Saarland	The authority links shared DSK text. The phrase is an application example; the operative employee clause retains its scale and effects conditions.
Saxony	An earlier own list dated 6 June 2018 is available. The current authority page links the shared DSK version; the earlier document is historical context.
Saxony-Anhalt	Own public-sector list includes AI interaction and evaluation uses. It also separately describes extensive employee-behaviour processing.
Schleswig-Holstein	An earlier own list of 25 May 2018 remains available. The current directory presents shared DSK version 1.1 and labels replaced versions separately.
Thuringia	Original unavailable. The DSK directory and the authority's 2019 handout identify a 4 July 2018 own list, but its operative text could not be read. No clause or translation is supplied here.

BfDI publishes a separate list for federal public bodies. The shared DSK text does not fill the Thuringian original-text gap. Full source details and translations: linked article.
