Mistral Medium 3.5	Scaleway 1.50 / 7.50 · Mistral EU access point 1.4025 / 7.0125

Where requests are processed

STACKIT: Germany South · IONOS: Germany · OVHcloud: Gravelines, France · Scaleway: Paris · Mistral: EU and EFTA on its EU access point (+10%), no commitment at the standard rate · Infomaniak: Switzerland

Seven checks before you choose

1. Where requests are processed: region, data centre, and which address your system calls.
2. What happens to prompts: stored or not, for how long, and whether they train models.
3. The exact model and its end-of-life date: same name is not always the same version.
4. Currency and VAT: CHF or EUR, net or gross, and whether a price is converted.
5. Limits: requests per minute and whether your volume fits.
6. Commitments: monthly minimums, bundles, free tiers and batch discounts.
7. Paperwork: a data processing agreement and the certificates the provider names.
